

**Horse Safety Australia Inc. endorses these products . Please note manufacturer's instructions for assembly and maintenance.**

SmartRider classic "breakaway" stirrups have been tested in accordance with international standards by the TUV Testing facility in Munich.

With normal stirrups, when a rider is thrown from a horse, the foot can become trapped and the rider dragged. With the classic breakaway stirrups the inner bar is released, freeing the rider.

The SmartRider 'Escape' Breakaway Stirrup is a two-part stirrup that disengages, setting the rider free when in a position of danger. SmartRider Escape stirrups come in a variety of colours and styles.
